SSL/TLS Vulnerability Scanner Report

✔ **replenish-your-space.webnode.ec**

The Light SSL/TLS Scanner only checked for port 443. Upgrade to run Deep scans against multiple SSL-enabled ports.

Summary

Overall risk level:

Info

Risk ratings:

High:	0
Medium:	0
Low:	0
Info:	19

Scan information:

Start time:	Sep 09, 2024 / 18:56:47 UTC-05
Finish time:	Sep 09, 2024 / 18:59:08 UTC-05
Scan duration:	2 min, 21 sec
Tests performed:	19/19
Scan status:	Finished

Findings

Found 1 open port with SSL/TLS support.

Port	State	Service	Server version	Uses SSL/TLS
443	open	https		Yes

SSL/TLS: Certificate is trusted

port 443/tcp

The domain has been found among Subject Alternate Names (SAN) or is the Common Name (CN) itself.
Therefore, it is considered protected by the certificate.

The Server Name Indication (SNI) has also been found. SNI is an extension to the TLS protocol that allows a client or browser to indicate which hostname it is trying to connect to at the start of the TLS handshake.
This allows the server to present multiple certificates on the same IP address and port number.

SSL/TLS: Certificate is Valid

port 443/tcp

46 >= 30 days

SSL/TLS: CA Issuer is invalid or it cannot be identified

port 443/tcp

R10 (let's encrypt from us)

Details

Risk description:
The certificate does not have a valid Certificate Authority Issuer, which are important for checking identity of the owner. Having this risk may result in the browsers not being able to validate the server's identity, compromising the communication between the server and

users.

Recommendation:
We recommend you to configure a valid Certificate Authority Issuer for your servers's certificates.

Tested for certificate issues.
port 443/tcp

Certificate number: #1
Issuer: R10 (Let's Encrypt from US)
Signature: SHA256 with RSA
Serial number: 0441B71CD4AB21DB772F76BD4029D9EC8D79

SSL/TLS: Not vulnerable to Heartbleed
port 443/tcp

SSL/TLS: Not vulnerable to CCS Injection
port 443/tcp

SSL/TLS: Not vulnerable to Ticketbleed
port 443/tcp

SSL/TLS: Not vulnerable to ROBOT
port 443/tcp

SSL/TLS: Not vulnerable to Secure Renegotiation
port 443/tcp

SSL/TLS: Not vulnerable to CRIME
port 443/tcp

SSL/TLS: Not vulnerable to POODLE
port 443/tcp

SSL/TLS: Not vulnerable to SWEET32
port 443/tcp

SSL/TLS: Not vulnerable to FREAK
port 443/tcp

SSL/TLS: Not vulnerable to DROWN
port 443/tcp

SSL/TLS: Not vulnerable to LOGJAM
port 443/tcp

SSL/TLS: Not vulnerable to BEAST
port 443/tcp

SSL/TLS: Not vulnerable to RC4
port 443/tcp

Tested for SSL/TLS vulnerabilities
port 443/tcp

Scan coverage information

List of tests performed (19/19)

- Checking for SSL/TLS services...
- Checking if the certificate is trusted...
- Checking if the certificate is expired...
- Checking for Certificate Authority Issuer...
- Checking the certificate on port 443...
- Scanning for HEARTBLEED on port 443
- Scanning for CCS on port 443
- Scanning for TICKETBLEED on port 443
- Scanning for ROBOT on port 443
- Scanning for SECURE_RENEGO on port 443
- Scanning for CRIME_TLS on port 443
- Scanning for POODLE_SSL on port 443
- Scanning for SWEET32 on port 443
- Scanning for FREAK on port 443
- Scanning for DROWN on port 443
- Scanning for LOGJAM on port 443
- Scanning for BEAST on port 443
- Scanning for RC4 on port 443
- Tested for SSL/TLS vulnerabilities
